Cybersecurity Awareness for Safer Online Experience: Navigating AI Risks, Data Privacy, Incident Reporting

by

Dr. Hanane LAMAAZI,

Information Systems and Security Department,

CIT, UAE University, UAE

Day: Mon/Tues, 21-22Oct 2024
Time: 12:00 PM – 2:00 PM
Room: E1-G053/E1-G020

Abstract:

The primary goal of this workshop is to provide the learners with vital insights into the essential cyber security knowledge and skills to safely navigate the digital world. It covers critical topics, including the risks associated with artificial intelligence, best practices for data privacy protection, and essential safe internet practices. The workshop is a great opportunity to learn how to recognize and mitigate AI threats, safeguard personal and organizational data, and employ effective strategies for secure online behavior. The workshop will empower the learners to enhance their cybersecurity awareness and protect themselves in an increasingly complex environment.

The workshop is hosted by the CIT, UAE University, and promoted under the Cyber Pulse initiative organized by the General Women's Union in conjunction with the Cyber Security Council and Aqdar Initiative, in UAE.
